

- **State-of-the-art environmental technology**
- **Acid-resistant construction**
- **Heavy-duty steel exo-structure**
- **Controlled air flow maintains negative internal pressure**
- **Designed to work with WetScrubber**
- **Hoist cables allowed to pass through gasket in roof of enclosure**
- **Internal lighting per safety standards**
- **Extends building life by reducing corrosion from pickling fumes**
- **Workers control pickling line from outside of the enclosure**
- **Reduces health hazards for workers**
- **Motorized Transfer Trolley, Conveyor, or Dryer bring loaded Jigs in and out of enclosure**
- **Automatic door controls**
