

- Removes Iron and adjusts pH
- Low operating costs
- Fully automatic: Automatic pH control and oxidizing agent injection.
- Reduces Iron flux while maintaining levels below 2 gr/Liter.
- ZnCl₂ is not removed by filtration.
- Holds a consistent flux bath quality which reduces immersion time, zinc pick up, and dross formation.
- Reduces coating defects and minimizes maintenance.
- Filter Press with 1.15 m³ (40 ft³) filter capacity
