

- Vertical Counter-Flow Clear
- Clear Access Inspection Windows
- Bolt-on Pack Fill
- Removable Packing and Mist Eliminator
- Bolt-on Clean-out Doors
- Fresh Water Make-up Flow Meter
- In-line Y-strainer
- CPVC Pump with Motor
- Diaphragm Valve
- Removable Spray Headers
- Overflow and Drain
- Designed specifically for galvanizing
- Made with Corrosion Resistant Materials
- Wetted and Packed-bed Technology removes water soluble contaminants, soluble gas and particulate matter via
  - \*Impingement and \*Gas Absorption

**\*Impingement:**

Contaminated air stream is forced through a wetted packed bed, then through a chevron blade or mesh pad filter section for particulate removal.

**\*Gas Absorption:**

Gasses are absorbed by the liquid
